DemoServlet.java

```
package com.demo.web;  
  
import javax.servlet.GenericServlet;  
  
public class DemoServlet extends GenericServlet {  
}
```

Class 'DemoServlet' must either be declared abstract or implement abstract method 'service(ServletRequest, ServletResponse)' in 'GenericServlet'

Implement methods Alt+Shift+Enter More actions... Alt+Enter

Left click here

vlet
struct class GenericServlet
bject
implements javax.servlet.Servlet, javax.servlet.ServletConfig, java.io.Serializable

Defines a generic, protocol-independent servlet. To write an HTTP servlet for use on the Web, extend [javax.servlet.http.HttpServlet](#) instead.

GenericServlet implements the [Servlet](#) and [ServletConfig](#) interfaces. [GenericServlet](#) may be directly extended by a servlet, although it's more common to extend a protocol-specific subclass such as [HttpServlet](#).

GenericServlet makes writing servlets easier. It provides simple versions of the lifecycle methods [init](#) and [destroy](#) and of the methods in the [ServletConfig](#) interface. [GenericServlet](#) also implements the [log](#) method, declared in the [ServletContext](#) interface.

To write a generic servlet, you need only override the abstract [service](#) method.

Gradle: javax.servlet:javax.servlet-api:3.1.0

Git TODO Problems Terminal Build

Class 'DemoServlet' must either be declared abstract or implement abstract method 'service(ServletRequest, ServletResponse)' in 'GenericServlet'

Edit server.xml

20:45 24-10-2021

*C:\work\temp\wlp\usr\servers\defaultServer\server.xml - Notepad++

File Edit Search View Encoding Language Settings Tools Macro Run Plugins Window ?

server.xml

```
updateTrigger="polled"/>
    <applicationMonitor updateTrigger="mbean"/>
<!--
<ejbApplication id="TestEJBOnLiberty" location="TestEJBOnLiberty.jar"
name="TestEJBOnLiberty"/>
<ejbApplication id="ejb32"
location="C:/work/wlp/usr/servers/defaultServer/dropins/gradle-ejb32-1.0-SNAPSHOT.jar"
name="gradle-ejb32"/>
    <webApplication contextRoot="helloworld" location="ServletEjbClient.war"/>
-->
<webApplication id="App" location="App.war" name="App"/>
</server>
```

Add the above snippet do deploy
the Application

server.xml messages.log

Initialization successful.
